

# VINYL WINDOW 4-SEASON SUN ROOMS

## SRC V3 SUN ROOMS

### THE NEW STANDARD IN SUNROOMS

For years, customers told us they wanted more options when it came to designing their sunroom. We listened and created the V3 sunroom by Sunroom Concepts.

We added the ability to use casements, double hungs, and even awnings to our popular window sliders. You can even get blinds if you use casements in your sunroom. Customers wanted a limited lifetime warranty so we gave it to them with our vinyl wall panel.

While we added several window combinations, we still kept great features including:

- **Cardinal 366 Glass:** Lots of companies tell you their glass is great, but we back ours up with 3 layers of silver and 14 layers of protection overall. It blocks 95% of the UV rays so you can enjoy your sunroom without burning out your air conditioner.
- **Neat Glass:** This special coating helps clean your windows so you don't need to do it as often. Sunrooms are for relaxing, not spending tons of time maintaining.
- **Super Spacer:** This all foam spacer systems helps insulate your glass to provide greater energy efficiency and helps reduce sound.
- **Energy Efficient Windows:** All of the windows meet or exceed the .30/.30 criteria the federal government uses criteria for the economic stimulus package.
- **"Poly-Iso" insulation:** This optional insulation improves the R-value of the wall over traditional EPS walls. It is so good that the wall receives better R Values than our competitor's 4" and 6" walls. We want you to use the space for relaxing, not take up more room for the wall or insulation.
- **Extensive Wall Finish Choices:** Aluminum, Hardboard (Roughsawn or Stucco Finish) and Maintenance-Free Vinyl. Standard colors are white and clay.

Room colors include white and clay. Design your room and relax with sunrooms that incorporate the latest technology and options.

Our windows feature:

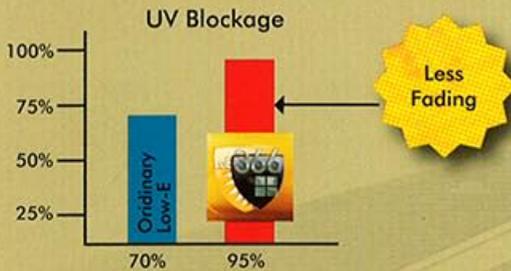

# EXTENDED SEASON PATIO ROOMS MODEL V3

The Sun Room Concepts Model V3 has many distinct features that will help you enjoy your new room.

## Low-E<sup>3</sup> 366 Glass

The V3 features 3 layers of silver to help keep the heat out and reduce the stress on your air conditioner.

## NFRC Ratings

All vinyl windows used in the V3 meet or exceed the energy requirements set in the economic stimulus package.

Window (No Grids)	U-Factor	SHGC
3300 Double Slider	.29	.21
400 Casement	.26	.23
3400 Picture Window	.28	.23

U-Factor measures how well a product prevents heat from escaping. The lower the u-value, the better.

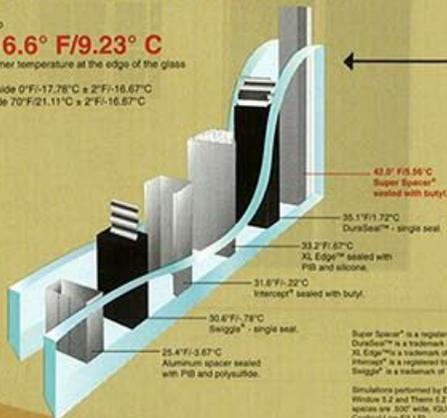

Solar Heat Gain Coefficient (SHGC) measures how well a product blocks heat caused by sunlight. The lower the SHGC, the less solar heat transmits and reduces fading.

## Super Spacer<sup>®</sup>

This revolutionary spacer is all-foam and contains no metal. Super Spacer<sup>®</sup> helps keep your new sunroom cool in the summer and warm in the winter.

up to  
**+16.6° F/9.23° C**  
warmer temperature at the edge of the glass

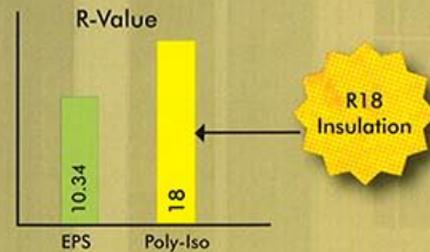

Outside 0°F/-17.78°C ± 2°F/-16.67°C  
Inside 70°F/21.11°C ± 2°F/-16.67°C

DuraSeal™ is a trademark of TruSeal Technologies, Inc.  
XL Edge™ is a trademark of Cardinal Glass Industries  
Intercept<sup>®</sup> is a registered trademark of PPG Industries, Inc.  
Swiggle<sup>®</sup> is a trademark of TruSeal Technologies, Inc.  
Simulations performed by EnerModel Engineering Ltd. using Window 5.2 and Therm 5.2 as per NFRC100-2001. All air spaces are 200" wide, 1024" wide 24" x 48", Low-E glass is Cardinal Low-E2 172.

## Poly-Iso Wall Insulation

This optional wall insulation provides almost double the amount of R-value per inch. The higher the R-Value the better the insulation.
